

ROOFING TOWARD A GREENER TOMORROW

The U.S. Green Building Council's (USGBC) LEED® program provides environmentally conscious building owners a framework for designing energy efficient structures. Understanding this process can seem like a daunting task. Recycled content, high SRI's, low VOC's; how do you make sense of the ever changing certification requirements? DRI-CON's, Leeding Edge™ team will make sure your roof system is used to its full potential, taking advantage of all possible credits. Whether pursuing a certified, silver, gold or platinum classification our Leeding Edge™ team will develop a strategy to ensure your project goals are met on time and within budget. The world of roofing and construction is moving faster than ever and at DC we want to be there every step of the way assisting with all your green roofing needs.

DRI-CON LEEDING EDGE™ ADVANTAGE

ROOFING CREDIT SCORE CARD

DRI-CON has developed a LEED® pre-construction scorecard allowing GC/Owner to see the exact roofing credits that apply to the project and our strategy to capitalize on each.

SYSTEM SPECIFIC DOCUMENTATION

Precise documentation of every product utilized in the roofing assembly will first be thoroughly reviewed and made available to the GC/Owner for submission to the USGBC®

PROJECT TEAM COLLABORATION

DC Leeding Edge™ team will work to provide unparalleled support to ensure every aspect of your LEED® designed project progresses fluidly from conception through completion.
